- Excellent Stability and Dampening Utilizing Bilstein Shocks, 2 per Wheel
- Extensive Clearance Between Suspension Arms

- Offboard Air Compressor
- Energy Polyurethane Bushing
- Tow and Camber Wheel Adjustments
- Integrated Internal and External Jounce Bumpers, Allowing Travel Without Air in Case of Emergency
- Curb-Side and Road-Side Schrader Valves to Adjust System Pressure If Compressor or Power is Unavailable

ELECTRICAL

- 600W Total Solar
- (2) 270Ah Battleborn Lithium Batteries
- Victron 3000W Inverter Charger
- 2 Victron 50A Solar Chargers
- **Solar Upgrade:** Additional (2) 270Ah Battleborn Lithium Batteries, (2) 300W Portable Solar Panels
- 30A Shore Power
- Off Road LED Light Bar
- Wifi Ranger

EXTERIOR

- 2 Full-Sized Spare Tires
- Exterior LED Lighting
- (2) 30lb LP Tanks
- Brush Guards
- Thule Legless Awning
- Enclosed Underbelly
- Aluminum Triple Step

BUILD

- Composite Walls, Roof, Floor
- No Wood Throughout Unit
- Heated/Insulated Tanks
- Huck Bolted Aluminum Frame
- Articulating Hitch
- Automotive Off-Road Bumper
- 25" Ground Clearance
- Full Body Wrap
- Polyurea Coated Front Wall & Extrusions
- Puncture Proof Underbelly

SPECIFICATION DEFINITIONS

GVWR (Gross Vehicle Weight Rating): is the maximum permissible weight of the unit when fully loaded. It includes all weights, inclusive of all fluids, cargo, optional equipment and accessories. For safety and product performance do NOT exceed the GVWR. **GAWR (Gross Axle Weight Rating):** is the maximum permissible weight, including cargo, fluids, optional equipment and accessories that can be safely supported by a combination of all axles. **UVW (Unloaded Vehicle Weight):** is the typical weight of the unit as manufactured at the factory. It includes all weight at the unit's axle(s) and tongue or pin and LP Gas. The UVW does not include cargo, fresh potable water, additional optional equipment or dealer installed accessories. **CCC (Cargo Carrying Capacity):** is the amount of weight available for fresh potable water, cargo, additional optional equipment and accessories. CCC is equal to GVWR minus UVW. Available CCC should accommodate fresh potable water (8.3 LBS per gallon). Before filling the fresh water tank, empty the black and gray tanks to provide for more cargo capacity. Each Forest River RV is weighed at the manufacturing facility prior to shipping. A label identifying the unloaded vehicle weight of the actual unit and the cargo carrying capacity is applied to every Forest River RV prior to leaving our facilities. The load capacity of your unit is designated by weight, not by volume, so you cannot necessarily use all available space when loading your unit. All information contained in this document is believed to be accurate at the time of publication. However, during the model year, it may be necessary to make revisions and Forest River, Inc., reserves the right to make all such changes without notice, including prices, colors, materials, equipment and specifications as well as the addition of new models and the discontinuance of models shown in this document. Therefore, please consult with your Forest River dealer and confirm the existence of any materials, design or specifications that are material to your purchase decision.
